Highland's Helping Hands, participated in Manchester Rebuilding Together Day!

A group of 22 students, known as Highland's Helping Hands, along with 10 adults, participated in the recent Manchester Rebuilding Together Day. The group was assigned the task of completing yardwork (raking, mowing, planting, mulching, branch clean up, etc) at two different homes in town. Everyone had a great time knowing they were helping people who really appreciated the efforts. Now, there are quite a few parents who know that their children really do know how to do yardwork... don't let them fool you, moms and dads!

At the BBQ following the event, the students were already talking about next year!
